Treatments that are combined under the Main health complaint are listed on this List. You can however change any of these Treatment Groups - and make up Your Own Group for your specific needs, with the use of your computer. This way you can treat yourself on the Group listing during the night while sleeping on the mat. As these are all long treatments we do suggest for you to use the "Mat" while using the group function.

We include the treatment list for you that is currently on the Group list, this will enable you to put the original treatments back onto the Group list at a later stage if need be.
